

Driving decarbonization and digitalization. Together.

Senior Engineer Development Centre

Job description

In your new role you will:

- Test package generation for new products with higher complexity (software & hardware development).
- Test package optimization & sustaining and/or sub-cons technical support.
- Innovate test concepts & methods (feasibility & realization in production testing). Responsible for test knowledge transfer to production, test package buy-off and documentation.
- Participate in new tester platform benchmarking.
- Enhance test package with Zero defects approach (IV leakage test, poka-yoka mixing, etc.)
- Participation in Community of Practice within Test Engineering community and also exchange/sharing knowledge in the global Test Engineering community.
- Demonstrate measurable impact on working results on a local basis (MALDC).
- Contributes to the success of project/team, shares knowledge within project/team and demonstrate capability & dedication to solve problems

Profile

You are best equipped for this task if you have:

- Masters/Bachelor's Degree in Engineering (Electrical / Electronics/Power Analog/ Physics / Microelectronics / Semiconductor Technology).
- 3 to 5 years of experience in Power Discrete Products Testing and familiar with Automated Test Equipment (ATE).
- Experience in ATE measurement equipment's (E.g. oscilloscope, thermal stream, handler basic operation).
- Experience with some number of years on high power/voltage switching knowledge know-how, Teradyne ETS88 tester and ipTest will be an added advantage.
- Statistical data analysis.
- Sound knowledge in schematic/electronic circuitry interpretation, loadboard design, layout optimizations & simulation.
- Good aptitude & passion in engineering analysis with systematic approach, problem solving and solution finding.

Benefits

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant 's experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
