

Driving decarbonization and digitalization. Together.

Senior Project Manager Power MOSFETs Small Signal (f/m/div)

Job description

As a Senior Project Manager, you take over a leading role to drive, grow and develop our +100 million € business revenue portfolios for new Power MOSFET/Small Signal Devices aiming to make life of everyone greener, safer and easier. These products are ideally suited for space-constrained automotive, industrial, and consumer applications such as battery protection, battery charging, LED lighting, load switches, DC-DC converters, level shifters, low voltage drives, and many more. Your technical background will complete the product development aspects of the role. As a Project Manager, addressing the needs and expectations of stakeholders can feel like maneuvering through a complex landscape, where agility and adaptability are essential to deliver best products on the market. For this you will be set on the Project Management Career Path, ensuring you acquire the right skill set according to internal norms, through trainings and coaching.

In your new job you will:

- **Lead product development projects** for enhancing the MOSFETs / Small Signal portfolio
- **Coordinate and align several sub-projects from development and manufacturing areas** (e.g technology, package, assembly, test, reliability, external suppliers)
- **Form, scale, guide and motivate diverse cross-functional project teams** to meet project scope, timeline and budget
- **Look at the bigger picture**, with business in mind, in order to identify and drive solutions for project success
- **Encourage** and cultivate the pursuit of innovative and creative solutions
- **Develop products along the product development life cycle** from product concept until product production ramp up
- **Define the right product qualification path** and assess resulting product electrical parameters with key stakeholders and team members **from local or cross sites** resource pools
- **Become part of the success story of Infineon!**

Profile

Your track record shows the ability to handle multiple interdependency project variables across different sites. You demonstrate strong communication skills through clarity of the message. Your experience in planning, reporting and managing projects builds up the right image for the project in front of upper management. You can find agile solutions for competing resource needs and show case the ability to judge and contain project risk according to project management principles.

Melanie Happerger, MSc
Recruiter

You are best equipped for this task if you have:

- **A university/university of applied science degree in Electrical Engineering, System Engineering, Power Electronics, Material Science, Applied Physics** or comparable
- **8+ years relevant working experience** in the semiconductor industry or relevant similar industries with focus on research and development projects/programs (**Small Signal** products as a strong advantage)
- **6+ years of experience in leading projects** as project manager (IPMA-C certified or willingness to become certified within 1 year)
- **Fluent English skills**, German skills or the willingness to learn as a strong advantage

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group I (<https://www.feei.at/wp-content/uploads/2022/05/minimum-salaries-white-collar-workers-2023.pdf>). The monthly salary is paid 14 times p.a. We offer a higher compensation depending on your expertise and skills.

Benefits

- **Villach:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; Child care in Villach & Klagenfurt; On-site social counselling and works doctor; Health promotion programs; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement; Performance bonus; Accessibility, access for wheelchairs

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant 's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.

–Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –

The **PSS division** powers decarbonization and digitalization with a wide range of energy-efficient and digital solutions. PSS semiconductors help avoid carbon emissions, use resources sustainably, manage power effectively and intelligently, give 'things' smart senses, and process data quickly and reliably. The portfolio includes

power, connectivity, RF, and sensor system technologies to develop smaller, lighter, smarter, and more efficient solutions for consumer devices, smart home/building applications, robotics, computing and data centers, charging devices, power tools, and much more.

The next generation of silicon and wide-bandgap (SiC and GaN) solutions provides unparalleled performance and reliability for 5G, big data, and renewable energy applications. These materials are paving the way for further energy and carbon savings. Highly precise XENSIV sensor solutions are enabling IoT devices to react intuitively to their surroundings for seamless user interactions while audio amplifiers bring exceptional sound experiences to smart speakers and other audio use cases.
