

Driving decarbonization and digitalization. Together.

Senior Project Leader Project Management

Job description

Plan, organize, lead and control the project at Backend Development to successfully achieve all project targets in terms of timeliness, quality and cost.

In your new role you will:

- Plan, organize and control the project/subprojects with marginal complexity (project classification class E), risk, impact and reach.
 - Manages a small project team with members from multi functional groups.
 - Manages and controls the entire project life-cycle and ensures hand-over to sustaining function.
 - Organizes the activities and resources needed for the project to ensure timely release of each milestone.
- Fully responsible for all operational decisions in the project and for the successful achievement of all project targets (time, quality, cost and budget)
- Be the key communication interface (for project related matters), representing Back End to other Infineon Divisions (e.g. Business lines, Central Functions e.g. Finance, PTI, FE Fabs, etc).
- Form and lead the project team and assigns responsibilities within project to Project Managers of sub-projects and Project Members.
- Use IFX project management tools to structure projects, control progress and for reporting and documentation.
- Drive problem solving activities within the project using standard Ifx trouble shooting methodologies, eg 8D, 5 Whys, etc.
- Continuously focuses on project quality, assesses progress and ensures that goals are met even in the face of challenges.
- Monitor changes against original project goals and seeks advice/approval for adapting plans.

Profile

You are best equipped for this task if you have:

- Masters / Bachelor's Degree in Engineering (Semiconductor Technology, Microelectronics, Automation, Mechanical, Electrical, Physics, etc)
- Project Management Professional Certification, preferred.
- At least 5 years of relevant working experience.
- Additional experience in working on projects (not necessarily as PJM).

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
