## Program Management Director for Automotive Silicon Carbide (f/m/div)

### Job description

E-Mobility is one of the key contributors to reduce pollution, our CO2 footprint and to use green energy in a smart way. If e-Mobility is powered by Infineon's solutions for an even higher efficiency and power density, the benefit is even higher. Our mission is to make this transformation happen as fast as possible, jointly with our customers and partner, by developing great products making a difference. Thus, we permanently look for great talents to join our team of high-voltage professionals. Would you like to take part in the fascinating technological development of power electronics in the automotive sector? Join Infineon and team up to set global trends in high-voltage applications!

As our new Program Management Director for Automotive Silicon Carbide, you will lead a team of experts to make decarbonization and green electromobility happen.

In your new role you will:

- Take over **interdisciplinary project ownership** to ensure execution and commercial success of projects
- Be in charge of **managing a portfolio of multiple cross-functional projects and initiatives**, which require a deep understanding of prioritization, interdependencies, and resource requirements
- **Lead international multidisciplinary teams and advice technical experts, project owners and managers** on best practices and value creation
- Be responsible for **providing clarity on deliverables and transparency** on project schedules, milestones, and related decision-making
- **Challenge and facilitate new products/projects** as they are established and executed, as well as **foster the ideation of additional products and solutions** to accelerate our synergy target achievement
- **Enable business success** with great automotive silicon carbide products
- **Report directly to the Vice President of the product line** while ensuring strategic delivery of priorities, taking responsibility for performance and budget management

### Profile

You are best equipped for this task if you have:

- A degree in **Electrical Engineering, Electronics, Economics** or a similar field

## Why Us

**Driving decarbonization and digitalization. Together.**

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

**– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –**

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization.

Infineon ATV is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
